

Hand Held Transmitter

[Model No: VCT-922-15]

VEDANG Hand Held Test Transmitter is wide band transmitters covering GSM / DCS and UMTS band in the single equipment. This instrument is very useful for Measuring signal propagation, positioning antennas, setting power levels or validating coverage.

The important features of this transmitter are:

- Sleek and light weight
- Easy to use
- Wide band
- Easy to calibrate

Specification :	
Frequency Range	869-2170 MHz
Channel Selection	Keyboard
Channel Separation	200Khz
Power Output	-5 to +13 dBm (In 1 dB Steps)
Power Accuracy	±0.5dB
Power Spur	≤ -50dBc
Frequency Stability	±1.5 ppm over 0-50°C
Second Harmonic Rejection	>30dBc
Connector	SMA Female
Power Input	4 * 1.2 V Rechargeable Battery / 220 V AC – 5V DC Adapter
Antenna	External
Dimensions	140 mm X 75 mm X 35 mm
Power Selection	Keyboard
